

## **Announcing: MagnetTx to Premiere Revolutionary LINAC-MR at ASTRO 2021**

FOR IMMEDIATE RELEASE:

**MagnetTx Oncology Solutions Ltd. to showcase details about its one-of-a-kind linear accelerator with MR guidance, Aurora RT™, at the American Society for Radiation Oncology's Annual Meeting.**

September 2021 (Chicago) – The team at MagnetTx is looking forward to hosting a booth at the 2021 ASTRO National Meeting in Chicago, Illinois, October 24-27. The meeting offers engaging education, scientific sessions and networking opportunities – booth exhibits run through the 26th, meeting sessions conclude on the 27th.

Attendees are invited to stop by booth #257 at the event. Many critical MagnetTx leaders will be at the meeting including Mike Cogswell, President & CEO, Brad Murray, Founder & CTO, Ron Drake, COO, as well as marketing associates.

The team is unveiling never-before-seen details about the groundbreaking Aurora RT LINAC-MR – the first ever to combine high-quality MR images with a 6 MV linear accelerator. Our state-of-the-art machine provides excellent images before treatment for accurate patient alignment, and its real-time MR imaging during beam delivery allows prior gating of tumor-tracking features. These designs make the Aurora-RT perfectly suited for adaptive radiotherapy – and unlike anything on the market for cancer treatment today.

*“We’re thrilled to speak to the radiation oncology community for the first time in person at ASTRO 2021 about Aurora RT,” said Mike Cogswell, President & CEO. “We’re confident this next generation of LINAC with MR guidance will provide a unique opportunity to help in the fight against cancer.”*

At booth #257, MagnetTx will also have a semi-private meeting area, so attendees can speak one-on-one with our experts. While at the booth, everyone can watch incredible videos highlighting Aurora-RT's impressive features, benefits and smart machinery.

**2021 ASTRO Annual Meeting: Embracing Change, Advancing Patient-Centered Care  
Chicago at McCormick Place West – October 24-27, 2021**

**MagnetTx Booth #257  
(Through October 26th)**

**Schedule an appointment to speak with an Executive on our website.**

MagnetTx Oncology Solutions Ltd. is a Canadian-based company that develops global pioneering technology. We've combined a linear accelerator (Linac), with real-time (concurrent) magnetic resonance imaging (MRI) to deliver radiotherapy to cancer patients. Our goal is to substantially reduce radiation treatment margins and improve cancer patient outcomes with fewer adverse side effects. Our first device is the groundbreaking Aurora-RT™.
